REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1, 3-14 are allowable over the prior art of record for at least the reason that the prior art fails to teach or suggest a system for maintaining an IC-module near a set-point temperature, comprising: a container having an open end with a seal for pressing against said IC-module; at least one nozzle; at least one window in said container; and a close-loop control means for: receiving a temperature sensor signal; cooling said module by spraying a liquid coolant from said nozzle; and heating said module by sending electromagnetic radiation through said window.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Neither Cader et al not Patel et al teach heating tested module by irradiating it through a window. Cader et al and Stevens teach testing system having a window for a visual inspection. Hashinaga et al (US Patent 5,327,075) teach heating tested module by sending electromagnetic radiation through a window, but do not teach nozzle spray liquid cooling. Examiner does not see any motivation for combining reference by Hashinaga et al with any of the references above.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Datskovskiy whose telephone number is (571) 272-2040. The examiner can normally be reached on 8-4:30.
